

ValueSet "Bodystructure Location Qualifier"

Julia Hummel

Interop-Forum 07.12.2023

MIO Laborbefund
Ort der Probenentnahme

FHIR Resource "Bodystructure"

Lateralität
Lokalisation innerhalb des Körperteils

Lateralität (laterality)
"Tumor an der linken Niere"

Lateralität (laterality) = links

Lokalisation (qualifier)
"Tumor an der lateralen
linken Niere"

Lokalisation (qualifier) = lateral

Lokalisation im Verhältnis zu bereits
beschriebenem Referenzpunktes
(hier Tumor) (surfaceOrientation)
"Weitere unklare Raumforderung an
der lateralen linken Niere ca. 1 cm
proximal des bereits beschriebenen
Tumors"

Lokalisation im Verhältnis zu bereits
beschriebenem Referenzpunktes
(surfaceOrientation) = kranial

| Name | Flags | Card. | Type | Description & Constraints |
|-------------------------|-------|-------|-----------------------------|---|
| BodyStructure | TU | | DomainResource | Specific and identified anatomical structure |
| identifier | | 0..* | Identifier | Elements defined in Ancestors: id, meta, implicitRules, language, text, contained, extension, modifierExtension Bodystructure identifier |
| active | ??? | 0..1 | boolean | Whether this record is in active use |
| morphology | | 0..1 | CodeableConcept | Kind of Structure Binding: SNOMED CT Morphologic Abnormalities (Example) |
| includedStructure | | 1..* | BackboneElement | Included anatomic location(s) |
| structure | | 1..1 | CodeableConcept | Code that represents the included structure Binding: SNOMED CT Body Structures (Example) |
| lateryality | | 0..1 | CodeableConcept | Code that represents the included structure laterality Binding: Bodystructure Location Qualifier (Example) |
| bodyLandmarkOrientation | | 0..* | BackboneElement | Landmark relative location |
| landmarkDescription | | 0..* | CodeableConcept | Body landmark description Binding: SNOMED CT Body Structures (Example) |
| clockFacePosition | | 0..* | CodeableConcept | Clockface orientation Binding: Bodystructure Body Landmark Clock Face Position (Example) |
| distanceFromLandmark | | 0..* | BackboneElement | Landmark relative location |
| device | | 0..* | CodeableReference(Device) | Measurement device Binding: Device Type (Example) |
| value | | 0..* | Quantity | Measured distance from body landmark |
| surfaceOrientation | | 0..* | CodeableConcept | Relative landmark surface orientation Binding: Bodystructure Location Qualifier (Preferred) |
| spatialReference | | 0..* | Reference(ImagingSelection) | Cartesian reference for structure |
| qualifier | | 0..* | CodeableConcept | Code that represents the included structure qualifier Binding: Bodystructure Location Qualifier (Example) |
| excludedStructure | | 0..* | see includedStructure | Excluded anatomic locations(s) |
| description | | 0..1 | markdown | Text description |
| image | | 0..* | Attachment | Attached images |

1. ValueSet aktuell unvollständig

Beispiel für fehlende Codes

- proximal
- ventral
- palmar
- volar
- median
- anterior
- aboral
- oral
- apikal
- basal
- kaudal
- kranial
- Quadranten
- Ortsangaben in Steinschnittlage/Uhrzeit
- ipsilateral
- kontralateral
- ...

1. ValueSet aktuell unvollständig

Beispiel für fehlende Codes

- proximal
- ventral
- palmar
- volar
- median
- anterior
- aboral
- oral
- apikal
- basal
- kaudal
- kranial

- ...

- Gibt es bereits Erfahrungen aus anderen Projekten oder Vorarbeiten/Überlegungen zu dieser Werteliste?
- Erarbeitung einer vollständigen Liste: Vorgehen? Abstimmung mit welchen Stakeholdern?

2. Theoretisch Verwendung desselben Codes an mehreren Stellen möglich

| | | | | | |
|-------------------|----------|----------|--------------------|--|--------------------------------------|
| identifier | Σ | 0..* | Identifier | Bodystructure identifier | |
| active | ?! | Σ | 0..1 | boolean | Whether this record is in active use |
| morphology | Σ | 0..1 | CodeableConcept | Kind of Structure SNOMED CT Morphologic Abnormalities (Example) | |
| location | Σ | 0..1 | CodeableConcept | Body site SNOMED CT Body Structures (Example) | |
| locationQualifier | 0..* | | CodeableConcept | Body site modifier Bodystructure Location Qualifier (Example) | |
| description | Σ | 0..1 | string | Text description | |
| image | 0..* | | Attachment | Attached images | |
| patient | Σ | 1..1 | Reference(Patient) | Who this is about | |

| | | | | |
|-------------------------|----------|------|-----------------------------|---|
| laterality | Σ | 1..1 | CodeableConcept | Code that represents the included structure |
| bodyLandmarkOrientation | | 0..1 | CodeableConcept | Binding: SNOMED CT Body Structures (Example) |
| landmarkDescription | | 0..* | CodeableConcept | Code that represents the included structure laterality Binding: Bodystructure Location Qualifier (Example) |
| clockfacePosition | | 0..* | CodeableConcept | Landmark relative location |
| distanceFromLandmark | | 0..* | BackboneElement | |
| device | | 0..* | CodeableReference(Device) | Body landmark description Binding: SNOMED CT Body Structures (Example) |
| value | | 0..* | Quantity | Clockface orientation Binding: Bodystructure Body Landmark Clock Face Position |
| surfaceOrientation | | 0..* | CodeableConcept | Measurement device Binding: Device Type (Example) |
| spatialReference | | 0..* | Reference(ImagingSelection) | Measured distance from body landmark |
| qualifier | | 0..* | CodeableConcept | Relative landmark surface orientation Binding: Bodystructure Location Qualifier (Preferred) |
| excludedStructure | | 0..* | see includedStructure | Cartesian reference for structure Binding: Bodystructure Location Qualifier (Example) |

2. Theoretisch Verwendung desselben Codes an mehreren Stellen möglich

fachlich kaum sinnvoll

Bsp.: Verwendung der Begriffe "links" und "rechts" nicht bei paarigen Organen, sondern von z.B. "lateral" und "medial"

"links an ~~an~~ linken Niere"

"lateral an der linken Niere"

Versehenhliche Angabe einer relevanten Information an der falschen Stelle durch Endanwender:in je nach Implementierung durch Primärsystem

Bsp.: Angabe der Lateralität bei Lokalisation

~~X~~ Lateralität: -
Lokalisation: links

✓ Lateralität: links
Lokalisation: -

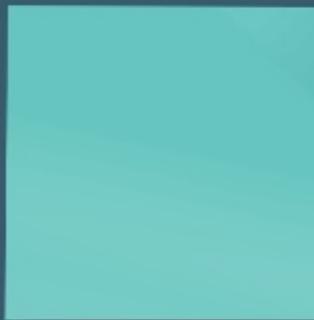

2. Theoretisch Verwendung desselben Codes an mehreren Stellen möglich

fachlich kaum sinnvoll

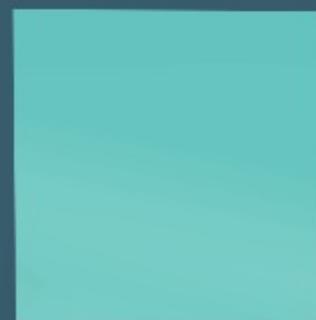

**Versehentliche Angabe einer relevanten
Information an der falschen Stelle durch
Endanwender:in je nach Implementierung durch
Primärsystem**

- Doppelte Verwendung desselben Codes problematisch? Falls ja, Lösungs-Ideen?
- Kürzen des ValueSets bei Lateralität?

1. ValueSet aktuell unvollständig

2. Theoretisch Verwendung desselben Codes an mehreren Stellen möglich

Vielen Dank für die 
Aufmerksamkeit und
Diskussion
